

PAVEMENT MARKING FIELD SECTION 620

620.1 SCOPE. To establish procedures for inspection, acceptance and reporting of temporary raised pavement markers and snowplowable permanent pavement markers and lenses.

620.2 PROCEDURE.

620.2.1 Qualified List. A list of temporary raised pavement markers which have been qualified are shown in [FS-620 Table 1](#) of this Manual. A list of snowplowable permanent pavement markers and lenses which have been qualified are shown in FS-620 Table 2.

620.2.2 If a manufacturer desires to have a temporary raised pavement marker added to the list of qualified temporary raised pavement markers samples should be submitted for laboratory evaluation. The samples are to be accompanied by a product data sheet, materials safety data sheet and specific results of tests performed on the particular marker.

620.2.3 If a manufacturer desires to have a snowplowable permanent pavement marker or lense added to the list of qualified products, they should be directed to Research and Development.

620.3 ACCEPTANCE. Markers appearing on the list of qualified temporary raised pavement markers or qualified snowplowable permanent pavement markers and lenses may be accepted on the basis of brand name, visual inspection and field performance. Inspection may be performed by Materials or Construction. A SiteManager sample record shall be created to document the brand, quantity, and acceptance of the markers or lenses.
